Work From Home Furniture IdeaBook

About Us

The company's origins date back to 1888, when Karl Hettich began making the new clock component he had invented. By 1930, his descendants had diversified into furniture fittings, setting up production in East Westphalia – a center of the German furniture industry.

Today, Hettich, still family owned, has become an industry leader with a worldwide reputation. We're one of the world's largest manufacturers of high-quality furniture fittings, with over 6,000 employees in more than 100 countries. The company's success has been built on four enduring values: quality, innovation, close cooperation with customers and absolute reliability. We work to inspire our customers with our ideas and our passion.

About two-thirds of the 4.3 million ITBPO workforce across the country have moved to a **work-from-home** model to keep services uninterrupted during the lockdown. Experts say some companies are likely to move to WFH permanently.

Visualizing a Scenario

Imagine, your office chair is your couch and your commute is the length of your hallway. Your snack drawer is your entire pantry. Do you think it's a dream? No! Since work-from-home is very much a reality these days due to the current pandemic crisis. Now some of them find it hard and struggle to do with many reasons behind it such as dividing work time and personal time, noisy neighbors, being indolent and many other distractions at home.

However, since most of the homes are not designed to also function as offices, it leads to distractions and dip in productivity.

We at Hettich have been at the forefront of recognizing the need for such solutions and accordingly have designed innovative work-from-home furniture solutions that will enable one to work comfortably and productively.

Eight elements of home office design

Location is the key.

Home offices come in many different shapes and sizes. It can be in a separate room, a quiet corner or even in your kitchen. The key to selecting the right place for your home office is to think about where and when you do your work.

Allow enough space.

Make sure you allow enough space to work comfortably. Ask yourself if you will be able to move easily from side to side, stand up and sit back from your desk.

Colour is important.

Colour is a super important detail. The wrong colour can have a negative effect on your desire to spend time in this room and can even hinder productivity. Pay special attention to your personal colour needs.

Invest in a great chair.

A chair is just as important, if not more important than the desk. Choose a chair that fits your body and promotes proper posture while working.

Desk is an essential.

A proper desk is the key to working comfortably from home. You need to like sitting on it because unless you feel comfortable, work might become a drudgery.

Let there be light.

Good lighting is critical for any home office space. Choose a location with some natural light and a view, if possible. Position your desk to face the windows or in a location where your computer screen will not be affected.

Organization is a necessity.

Storage is often overlooked when designing a home office and can really affect your productivity. Make sure to include enough shelving, filing cabinets or cupboards for your storage needs.

Inspire yourself.

Set up a mini-shrine — a few cherished knick-knacks, a piece of framed art, a special photo on your desk — that motivates you to create and/or get the work done so you can get out of there.

Home Office Furniture Ideas

In these uncertain times, our working has also evolved and work-from-home has become the 'New Normal'.

This book is a collection of practical and easy to implement Home Office furniture ideas with a good balance of aesthetics and functionality.

The most productive corner of the house.

Every house is different. It comes in varied shapes and sizes. In this concept, we have tried to showcase how one can create a neat working corner in the house, which has every element of the work office including a good desk.

Home Office Furniture Modules

Making the Open Office Covid-Resistant.

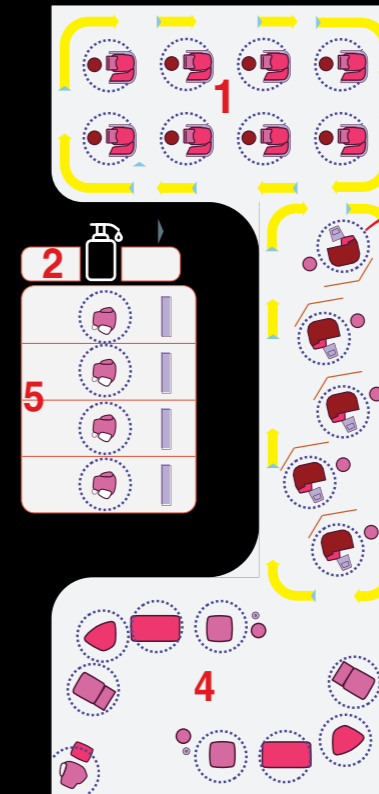

With nearly 7 million people affected by the coronavirus pandemic, organisations will need to redesign workspaces, stagger work hours and retrofit furniture to ensure the safety of employees. Here's a look at some solutions.

1. Higher space division creates separation and psychological comfort.
2. Sanitation stations provide easy access to cleaning supplies.
3. Changing the arrangement (geometry) of the desks reduces face-to-face orientation.
4. Individual seating in lounge spaces help to maintain a safe distance.
5. Added video conferencing enclaves enable remote collaboration, allowing fewer people to work in the office at the same time.

Pre-Covid Office

The New Normal

Minimum Distance

Create minimum 6ft/2m distance between people in open workstations, meeting spaces, cafés and lounge spaces.

Clockwise Movement

Use neon strips to mark a path for people to walk on, in a clockwise direction, to prevent accidental face-to-face encounters, and regulate movement between workstations.

Design

The open office can be made safer for employees through the practice of design thinking. Here's a look at some solutions.

Density: Rearrange the floor plan so that no two people are sitting next to or directly facing each other; use diagonal seating arrangements, or leave alternate desks vacant.

Realign: Separate furniture pieces that allow multiple people to use them.

Barriers: In the case of close, clustered spaces, use shields to protect workers, if distancing of 6ft/2m is not possible.

Touch points: Eliminate touch points like switches, doorknobs, biometric entry and attendance systems.

Head out: If the office has a gym or a canteen, see if they can be moved out into natural light and air, with adequate distancing; employees must sanitise equipment before and after each use.

Flow

Reduce footfall by staggering work hours and work days to decongest office spaces.

Receptions: Expand receptions, arrange to meet people at the entrance rather than in office meeting rooms.

Meeting rooms: Open up, allow ventilation, natural light; change furniture set-up; avoid closed-room meetings.

Clustering: Reduce use of cluster points like central meeting tables, pantry.

Neon strips: Encourage people to move in a clockwise direction only, to avoid bumping into each other.

Water-cooler talk: Encourage people to use masks and maintain 6ft distance from each other even during casual interactions; discourage the use of water coolers, pantries and common dining spaces as these are high-cluster zones.

Lifts: Stagger employees' arrival times to prevent logjams at the lifts; Limit the number of people travelling in each lift.

Sanitation

Take particular care in meeting areas and toilets, near water coolers and coffee machines.

Disposable paper pads: Line workstations with disposable paper pads to keep them sanitary; encourage employees to be responsible for the hygiene of their desks.

Sanitation stations: Place hand sanitiser at multiple locations for people to use repeatedly; encourage people to bring their own too.

On-the-clock cleaning: Sanitise the floor and workstations multiple times during the day, not just once.
