

Easy way to find and order Hettich products online

Exciting new releases in the 2025 product lineup for industrial customers

Get Hettich's entire product expertise and order all items direct online in total relaxation – that's the premise behind the latest "Technology & Innovations 2025" online flip page catalogue, or "T&I" for short. This is where customers and partners from the furniture industry, contracting authorities and volume manufacturers can find precisely the right solutions for their projects. And also discover a whole raft of exciting new product releases from Hettich.

The new "Technology & Innovations 2025" online flip page catalogue is tailored specifically to volume production with bulk packaging and covers a deeper product mix. Each product is linked to useful information that can be clicked open or accessed by scanning a QR code. The item number then takes you to the actual item in the Hettich eShop: this not only lets you order online but also view and download the latest versions of key documents for each product, such as planning information in the form of CAD data, product data sheets or practical instructions on assembling and fitting products.

Simply browse the lineup, get all the news straight away

The latest new products and additions to the Hettich portfolio are each marked with an eye catching blue "News" button. And anyone wanting the full picture of new arrivals can simply click their way through the new products tour.

Evisys guiding hinge: top load carrying performer for spacious kitchen design

A newcomer at Hettich is the Evisys guiding hinge that opens up new creative options for kitchen planners. Positioned in the top door section, Evisys brings the necessary opening and closing stability to heavy, extra tall cabinet doors in front of built in refrigerators. In combination with Hettich's fixed door hinges, it's now possible to install doors weighing up to 80 kg – a whopping 10 kg more than before. This means users can load their refrigerator door more heavily while still keeping reveals perfectly aligned. The Evisys with integrated Silent System comes with further added convenience that's highly welcome in everyday kitchen routine: the hinge's damping effect now also closes the refrigerator door gently and quietly.

WingLine L folding door system: even more "Aaah"!

Hettich has optimised every part of its system of fittings for sliding doors. The result: even greater convenience, quieter running action, faster opening, easier installation – and altogether more flexibility in designing high end furniture with the WingLine L. Virtually hidden from view, the fitting technology provides a perfect look, whether in the kitchen wall unit, in the splashback zone or in large wardrobes. Door wings can have a maximum height of 2,600 mm, width of 600 mm and weight of up to 25 kg. The "Push to move" opening mechanism opens the door set all the way in response to just a single push. This is where the unique panoramic effect really impresses and permits access to everything inside. The absence of any profiles to get in the way on the furniture base panel makes the interior even more easily

accessible and enhances versatility of use. Door protrusion is minimal, and the door is securely held in the open position: drawers and runner components can now run past the door leaf collision free. Any item of furniture can also be upgraded for yet greater user friendliness by giving WingLine L the luxurious feel of soft opening or closing.

Quadro runners: the new platform generation

Introducing the latest Quadro generation, Hettich now offers an end to end platform for runners that also provides the option of switching between wooden and system drawers. This lets customers plan their furniture and only at the end decide which runners to use. The Quadro 25 2D partial extension runner has been included in the product portfolio as a cost efficient gateway option. Also new is the Quadro V6 5D full extension runner with a 30 kg load capacity: it comes with an intuitive 5 way adjustment capability and now makes precision reveal alignment the standard in wooden drawers too. The platform also provides the option of upgrading very large, heavy pull-outs to the Actro 5D runner. This now gives Hettich a unique Quadro lineup that brings elevated drawer convenience and precision to every furniture segment.

Printed catalogues now a thing of the past: paperless is more sustainable

Hettich's new "Technology & Innovations 2025" online flip page catalogue comes with several advantages: doing away with the print version saves no end of paper, and everything you need is available from any place around the clock at:

About Hettich

Founded in 1888, Hettich is one of today's largest and most successful manufacturers of furniture fittings on the international stage. The family owned company is based at Kirchlengern in the furniture making cluster of Germany's East Westphalia region. Some 8,600 members of staff work together to provide our future proof solutions in over 100 countries. Promising "It's all in Hettich", the Hettich brand provides a comprehensive portfolio of services that is consistently and resolutely geared to the needs of customers across the globe. By tradition, top priority has always been at the focus of everything we do to ensure sustainability at social, societal and ecological levels. www.hettich.com
